

## **Twinned cities:** virtuous models of solidarity, inclusion and decentralized cooperation

## Rome, 16th Octobre 2017

The initiative, organized by AICCRE, is part of activities to promote the Europe for Citizens Program, with the aim of demonstrating the importance of twinning as an international cooperation activity. Following the serious events caused by the earthquake that affected many Italian municipalities in 2016, there were concrete manifestations of solidarity expressed by Twinned Cities in the affected areas. The working day will allow an exchange of experience and planning amongst a hundred mayors from different countries who, through twinning, will be able to build new sustainable cooperation projects.
